

AIS Detectors & AIS Trackers

by Megan Weber

Extension Educator, Aquatic Invasive Species

State of Water Conference
April 12-14, 2018 – Breezy Point, MN

Laying the Groundwork for AIS Detectors

- Early detection critical
- Minnesota has:
 - 11,842 lakes (≥ 10 acres)
 - 6,564 rivers and streams
 - 10.6 million acres of wetland
 - >13 million acres of surface water
- And....limited AIS professionals

Increasing Capacity: AIS Detectors

- Developed by MAISRC and U of M Extension
- Network of trained citizen scientist volunteers
- Curriculum developed and reviewed by AIS scientists and experts

AIS Detectors: Target Species

Plants

Eurasian Watermilfoil

Hydrilla

Starry Stonewort

Invertebrates

Spiny Waterflea

Rusty Crayfish

Zebra Mussel

Quagga Mussel

Fish

Silver Carp

Bighead Carp

Ruffe

Round Goby

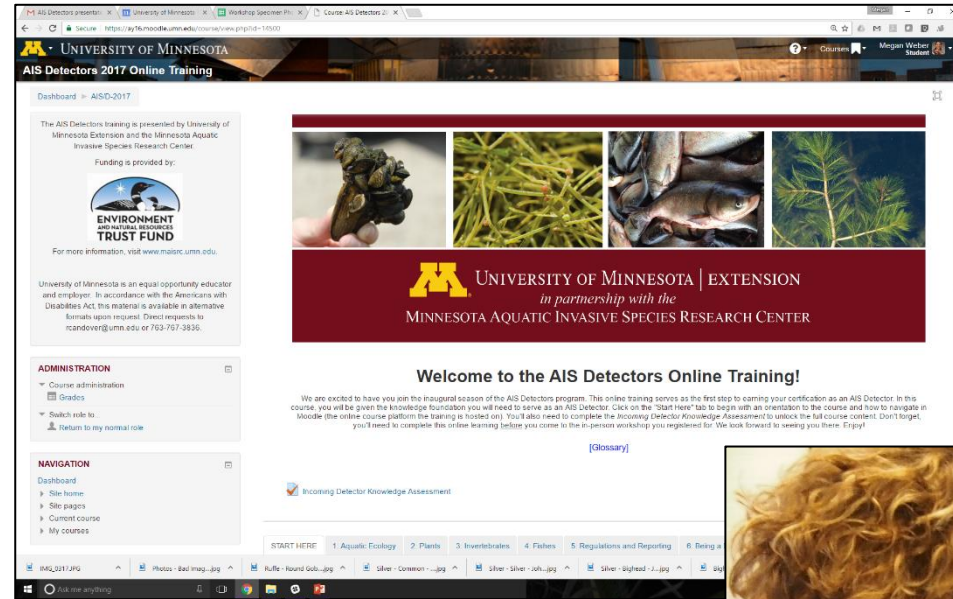

Program Requirements

- Complete initial training
 - Online and in-person
 - Approximately 16 hours total
- 8 hours of advanced training (annually)
- 25 volunteer service hours (annually)

Training Process: The “Flipped Classroom”

- Traditional lecture material covered pre-classroom
 - Approx. 8 hours
 - PowerPoints and videos
- In-Person Workshop
 - Hands-on learning
 - Species identification
 - Sample collection and report submission
 - Role-playing/scenarios

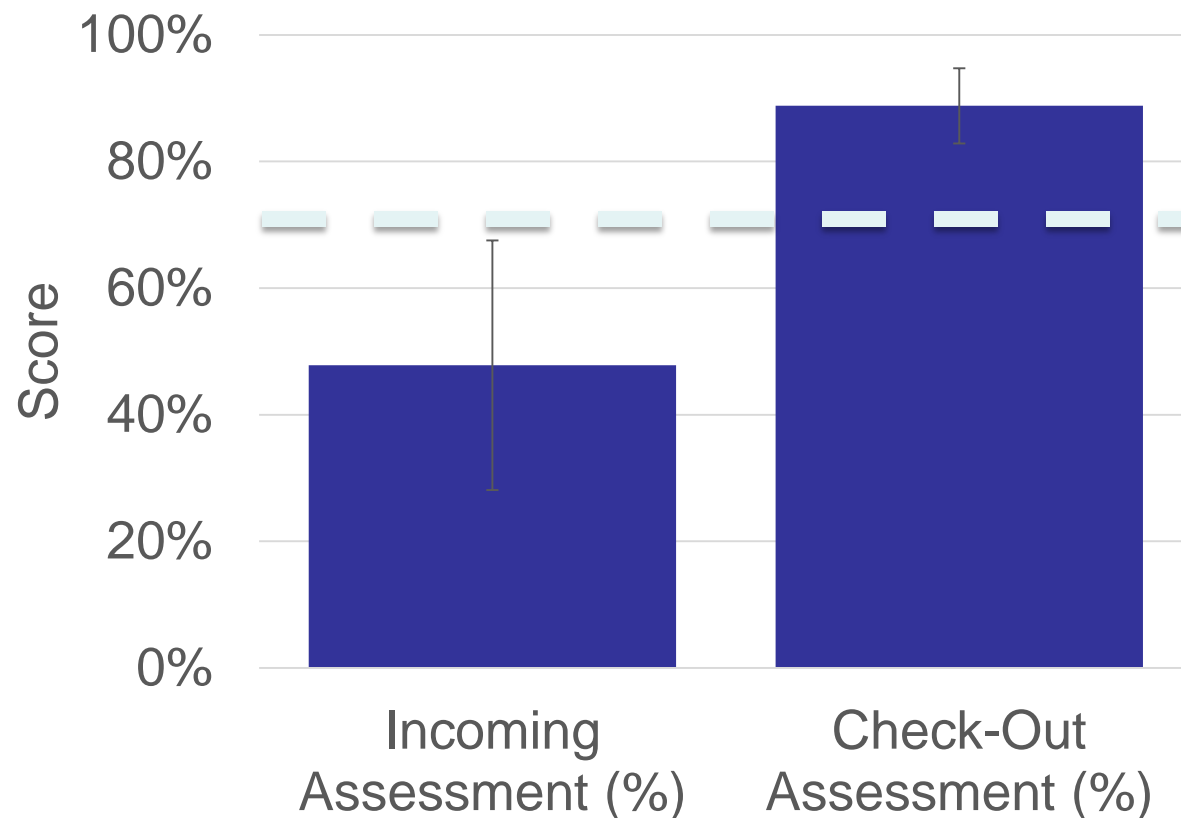

Participant Reviews

Participants are Learning!

Online Training Scores

Workshop Scores

Eurasian Watermilfoil

Northern Watermilfoil

What is Service?

- Education/Outreach

- Teaching about AIS (helping with presentations, etc)
- Developing signs/brochures for local lake association, county agency, etc.
- Staff a booth at a fair or other event

- Citizen Science

- Responding to reports of AIS for DNR
- Data collection for any AIS related project

- Stewardship

- "On the ground" activities

- Program Support

- data entry, stuffing envelopes, preparing datasheets, helping to organize groups of volunteers

Examples of Service Completed

- Helped MAISRC researchers
- Outreach at public events
 - Minnesota State Fair
 - Beltrami County Fair
 - Chisago County Fair
 - Itasca County Fair
 - Kanabec County Fair
 - Nicollet County Fair
 - Aqua Chautauqua
 - Center City Days
 - Fifty Lakes Day
 - Harmony in the Park Water Fest Night
 - Karl Oskar Days
 - Ki-Chi Saga Days
 - Kids Fishing Appreciation Day
 - Youth Education Summit

Examples of Service Completed

- Helped MAISRC researchers
- Outreach at public events
- Searched for AIS
- Gave talks at meetings and schools
- Built sampling equipment
- Hand removal of AIS

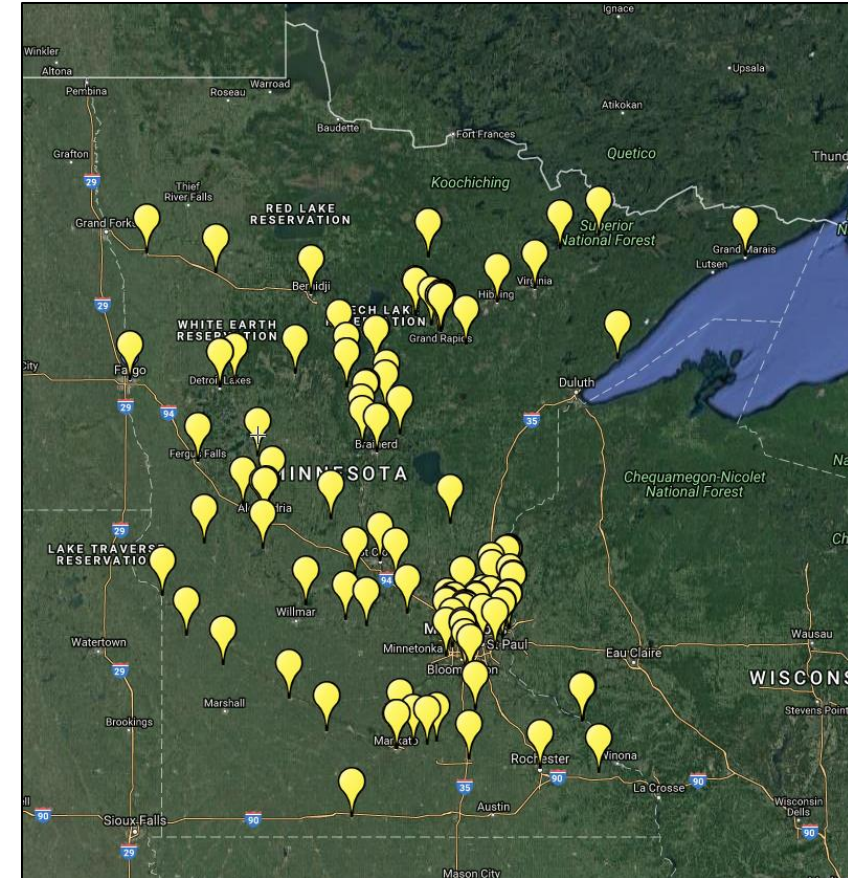

AIS Detectors Stats

7 workshops held across the state (2017)

AIS Detectors Stats

7 workshops held across the state (2017)
121 new AIS Detectors

AIS Detectors Stats

7 workshops held across the state (2017)

121 new AIS Detectors

2,171 hours of service

AIS Detectors Stats

7 workshops held across the state (2017)

121 new AIS Detectors

2,171 hours of service

16,968 miles driven to complete service

AIS Detectors Stats

7 workshops held across the state (2017)

121 new AIS Detectors

2,171 hours of service

16,968 miles driven to complete service

\$35,376 service impact

Join Us! (www.aisdetectors.org)

- Workshops begin next week
 - April 20th (Arden Hills)
 - April 27th (Victoria)
 - May 4th (Owatonna)
 - May 11th (Willmar)
 - May 18th (Brainerd)
 - June 1st (Duluth)

**\$25 off registration with code
WATER2018**

Need help with an AIS Project in your area?

- Recruit a Detector!
- We can help you find volunteers for your project

AIS Trackers: Program Overview

AN UNMET NEED

- Minnesota issues 250+ permits for invasive aquatic plant management each year (290 in 2015)¹
- In 2015, 16,500 lbs and 7,300 gallons of 2,4 D were applied for invasive milfoil control.²

The big question:

How can AIS control be maximized while non-target impacts to native species are minimized?

Our approach: Harness the power of highly trained citizen scientists to collect the necessary environmental/ecological/management data to enable adaptive management. This combines elements of citizen water quality and AIS monitoring programs

AIS TRACKERS

(Coming in 2018)

AIS Trackers: Training in Development

- Aquatic plant management
- How research & data guides management
- Aquatic plant identification
- Monitoring protocols
- Entering data in the database
- Being an AIS Trackers volunteer

Can you name all the
species in this image?

AIS Trackers: Next Steps

- 2018: Program Pilot
 - Demontreville-Olsen Lake Association (Washington Co.)
 - Work through training
 - Practice data collection for the first field season
- 2019: Broader Launch

Disclaimer:

- This is new ground!
- We will be learning together

More Coming in 2018

- AIS Detectors Advanced Training
 - AIS on the Water
 - An in-depth and in-person look at starry stonewort in Minnesota
 - Emerging Threats
 - AIS field trip

Is this leaf from Eurasian (invasive) or Northern (native) watermilfoil?

Is this leaf from Eurasian (invasive) or Northern (native) watermilfoil?

**Eurasian
Watermilfoil**
